

Aurora Minerals Group of Companies *Positioned for Growth*

Disclaimer

Important Notices

This presentation has been prepared to provide information on Aurora Minerals Limited's (Aurora) projects and those of Peninsula Mines Limited (Peninsula), Golden Rim Resources Limited (Golden Rim) and Predictive Discovery Limited (Predictive); companies in which Aurora has material investment. It is not intended as an offer, invitation, solicitation or recommendation with respect to the purchase or sale of any securities. This presentation should not be relied upon as the sole representation of any matter that a potential investor should consider in evaluating Aurora. Its affiliates or any of its directors, agents, officers or employees do not make any representation or warranty, express or implied, as endorsement of the accuracy, or completeness of any information, statements, representations or forecasts contained in this presentation, and they do not accept any liability for any statement made in, or omitted from, this presentation. Prospective investors should make their own independent evaluation of an investment in the Company.

Caution Regarding Forward Looking Information

This document contains forward looking statements concerning Aurora. Forward-looking statements are not statements of historical fact and actual events and results may differ materially from those described in the forward looking statements as a result of a variety of risks, uncertainties and other factors. Forward-looking statements are inherently subject to business, economic, competitive, political and social uncertainties and contingencies. Many factors could cause the Company's actual results to differ materially from those expressed or implied in any forward-looking information provided by the Company, or on behalf of the Company. Such factors include, among other things, risks relating to additional funding requirements, metal prices, exploration, development and operating risks, competition, production risks, regulatory restrictions, including environmental regulation and liability and potential title disputes. Forward looking statements in this document are based on Aurora's beliefs, opinions and estimates as of the dates the forward looking statements are made, and no obligation is assumed to update forward looking statements if these beliefs, opinions and estimates should change or to reflect other future developments.

Competent Persons Statement

The information related to exploration results is extracted from reports and announcements previously provided to the ASX. References for the reports and announcements are provided on Page 24 of this presentation. The company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement. The company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement. Certain information was prepared and first disclosed under the JORC code 2004. It has not been updated to comply with the JORC Code 2012 on the basis that the information has not materially changed since it was reported.

Exploration in Burkina Faso

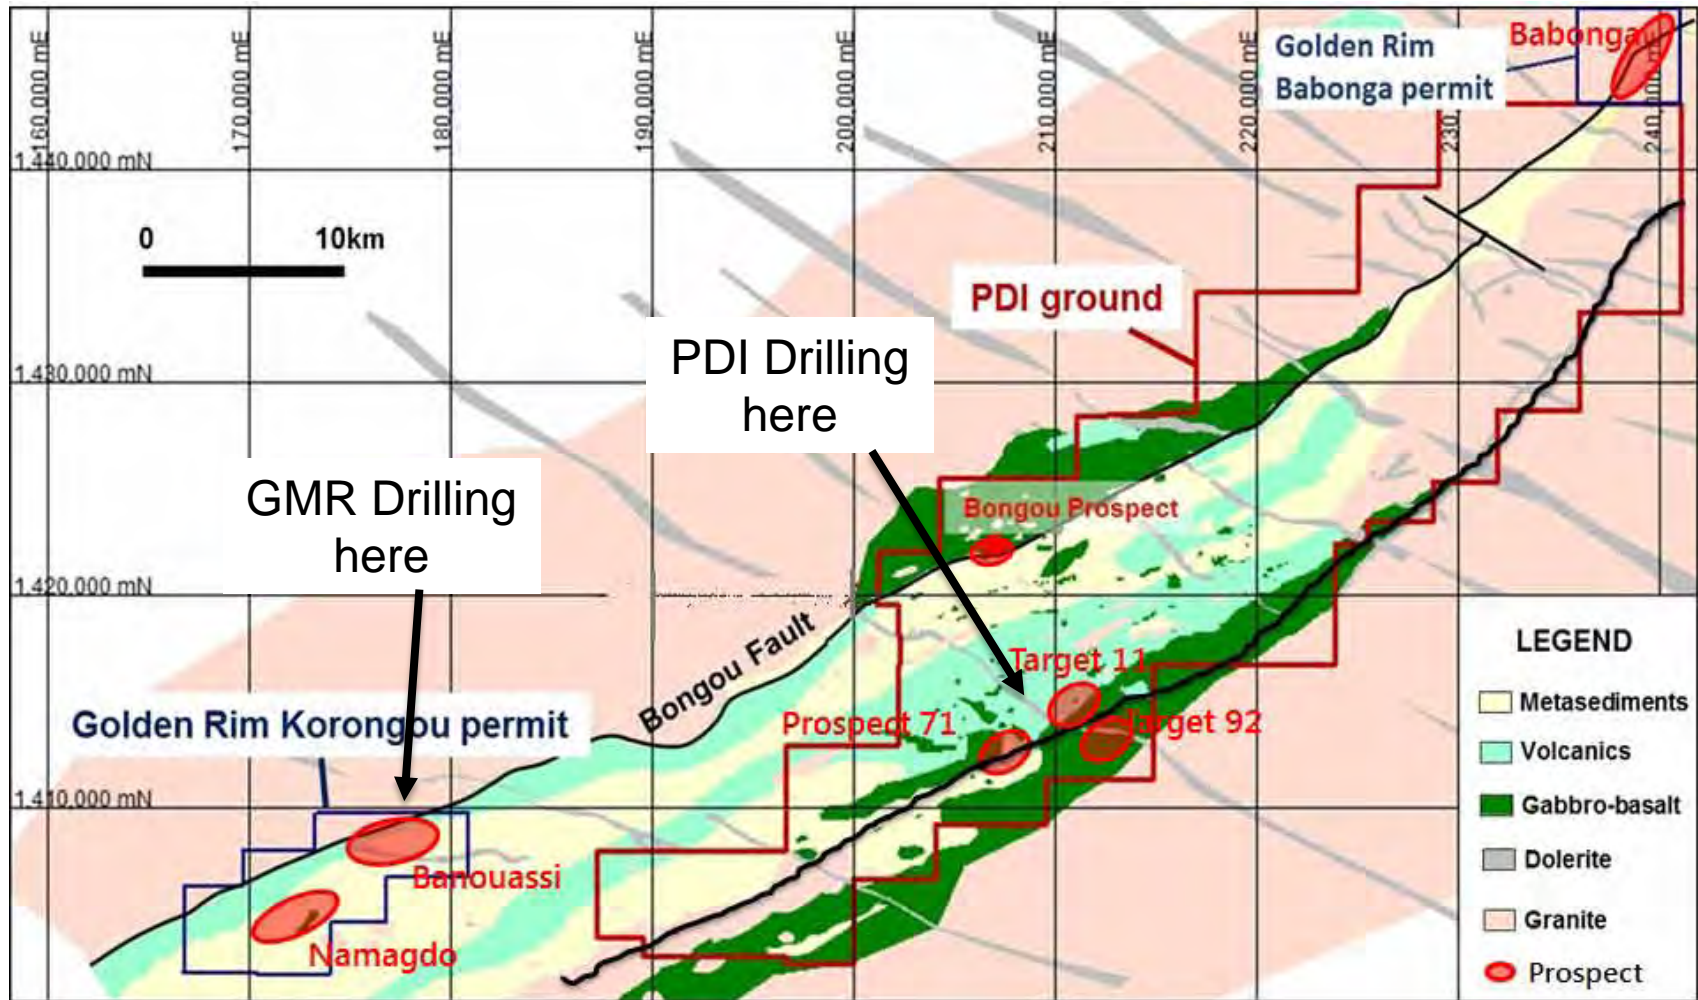

- § Aurora and its subsidiaries Predictive and Golden Rim gold exploration assets in Burkina Faso, West Africa
- § Demonstrated “fertile” Birimian Age Greenstone Belts
- § Burkina Faso hosts 7 new Gold Mines in the past decade, one of the world’s fastest growing gold producing regions

Golden Rim & Predictive Discovery (Burkina Faso Key Tenement Locations)

GMR – PDI SYNERGIES

Samira Hill Greenstone Belt – Emerging Gold Province

Burkina Faso Gold Exploration / Development

Bonsiega (PDI 75-100%)

- § Large prospective tract of Samira Hill Greenstone Belt
- § **Bongou Prospect** P1-P2
 - § high grade, thick, consistent true widths
 - § 52m at 3.2g/t Au incl. 6m at 10g/t Au
 - § 40m at 4.3g/t Au incl. 13m at 9.7g/t Au
 - § 36m at 5.0g/t Au incl. 15m at 8.9g/t Au
 - § 47m at 3.2g/t Au incl. 21m at 4.9g/t Au
 - § 41m at 2.8g/t Au incl. 5m at 7.8g/t Au
 - § 58m at 2.0g/t Au incl. 5m at 7.3g/t Au
- § Multiple additional advanced targets P3

Predictive Discovery

(Aurora 43.9%)

Bongou Mineral Resource

Cut-off	Indicated Resources			Inferred Resources			Total Resources		
	Million tonnes	Au (g/t)	Ounces	Million tonnes	Au (g/t)	Ounces	Million tonnes	Au (g/t)	Ounces
0.4	1.21	2.54	99,000	1.33	2.13	91,000	2.55	2.32	190,000
0.8	1.14	2.67	98,000	1.09	2.48	86,000	2.22	2.58	184,000
2.0	0.64	3.64	75,000	0.49	3.90	61,000	1.13	3.75	136,000
3.0	0.34	4.68	52,000	0.28	4.95	45,000	0.62	4.80	96,000

Predictive note the following key features of the Bongou deposit: ^{P1,2}

- § "it is intrinsically high grade, because:
 - § There is very little difference in contained ounces between the 0.4g/t Au cut-off and the 0.8g/t Au cut-off grades, and
 - § Over 70% of the resource ounces are retained when the cut-off grade is raised from 0.8g/t Au to 2.0g/t Au, with a high average grade of 3.75g/t Au.
- § The bulk of the estimated resources are contained in one mineralised granite body, which is thick in the near surface and appears to taper to the east. The deposit is not closed off to the south-west or at depth.
- § The shape of the mineralisation lends itself to a simple open pit mining operation, with high-grade mineralisation in the near surface position, which would suggest the possibility of early strong cash flow in a future mining operation. Gold grades are associated with pyrite-bearing altered granite, which is very visibly distinct from the adjacent low grade gabbro, suggesting that dilution can be minimised quite easily by standard grade control practice.
- § Previously reported metallurgical work on a composite sample of primary gold mineralisation from Bongou gave a 94% gold recovery from a standard 75 micron grind, 72 hour cyanidation test suggesting that gold recoveries from mining this deposit would be very high."

Highlights from Recent Drilling Samira Hill Greenstone Belt – GMR^{G8}

Initial Exploration Target Defined for Korongou

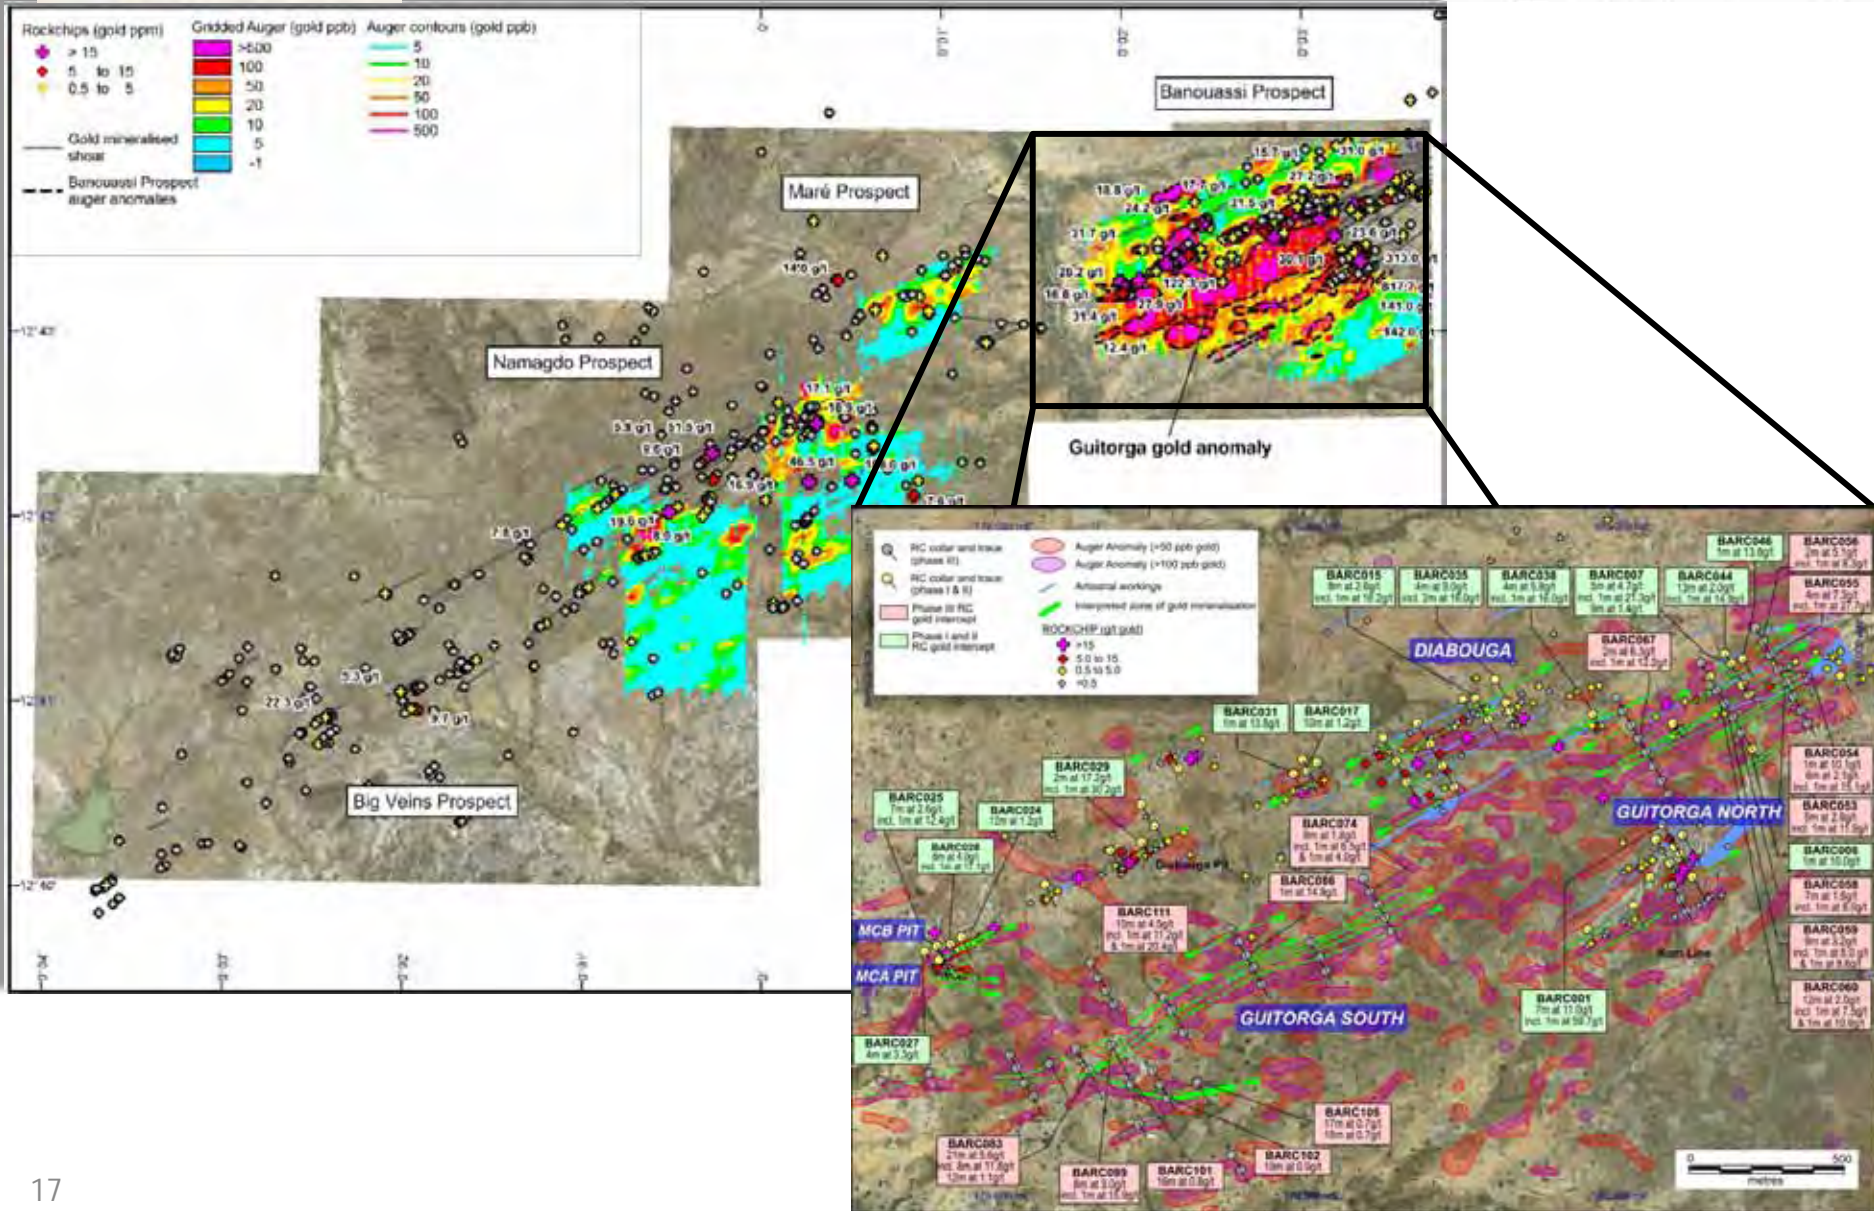

- Further zones of significant bedrock gold mineralisation discovered in Phase 3 RC drilling within the Guitorga auger anomaly at Korongou.
- The best new drill intersections include:
 - **10m at 4.5 g/t gold** from 15m, including **1m at 11.2 g/t gold** and **1m at 20.4 g/t gold** (BARC111);
 - **8m at 3.0 g/t gold** from 82m, including **1m at 15.9 g/t gold** (BARC099);
 - **17m at 0.7 g/t gold** from 54m and **18m at 0.7 g/t gold** from 76m (BARC105);
 - **19m at 0.9 g/t gold** from 5m (BARC102);
 - **16m at 0.8 g/t gold** from 49m (BARC101).
- An initial Exploration Target of approximately **500,000 ounces** to **611,000 ounces** of gold at an approximate grade range of **1.8 g/t to 2.2 g/t gold** has been identified at Korongou.
- Most of the gold zones included in the Exploration Target are open along strike and at depth.
- In particular, a **900m** gap in the drilling between the Guitorga North and Guitorga South areas offers scope to expand the Exploration Target.
- Further drilling, specific gravity measurements, metallurgical testing and resource modelling are planned over the next 9 months to determine the validity of the Exploration Target and to provide a potential maiden Mineral Resource for Korongou.
- Golden Rim has acquired its 90% interest in the Korongou Project.

Burkina Faso Gold Exploration

Korongou (GMR exercised option to 90%) ^{G8,G1a,b}

- § Gold mineralisation over **16km of strike, 1.2km – 2km wide corridor**
- § Major regional shear zone with multiple zones of gold mineralisation
- § Extensive zones of gold mineralisation defined from artisanal workings, mapping, rock chip sampling and auger drilling. Ready for further RC drilling to enable resource definition
- § In January 2015 GMR reported several rounds of results of the auger program. The results highlight a coherent 3.4km x 400m gold anomaly greater than 100ppb (0.1g/t Au) at the Guitorga prospect. ^{G1a}
- § In May 2015 GMR reported results of 4,000m RC drilling program best results included. ^{G7}
 - § 21m at 5.6 g/t gold from 13m, including 8m at 11.8 g/t gold and 12m at 1.1 g/t gold from 51m (BARC083)
 - § 9m at 3.2 g/t gold from 40m (BARC059)
 - § 12m at 2.0 g/t gold from 4m, including 1m at 10.9 g/t gold (BARC060)
 - § 4m at 7.3 g/t gold from 71m, including 1m at 27.7 g/t gold (BARC055)
 - § 8m at 1.8 g/t gold from 112m (BARC074) (ended in mineralisation)
 - § 1m at 20.7 g/t gold from 34m (BARC052)
 - § 1m at 14.9 g/t gold from 56m (BARC086).

Korean Focused Exploration/Development

Moly/Tungsten ^{D1}

- § Daehwa (100%) - Includes historic Daehwa and Donsan Mo & W mines
- § Recent **Diamond drilling** confirmed **high-grade moly mineralisation** and tungsten potential
- § **Excellent location** – favourable logistics
- § **Korean Government Funded** Drilling assistance program
- § **4,000m diamond core** program in progress
- § **Granted Mining Lease** ^{D3}

Gold/Base Metals ^{D1}

- § **Jinan (option to purchase 100%)** - Includes historic **Dongjin and Indae** mines with historic production grades over **17g/t Au** and **230g/t Ag** with base metal credits
- § **Osu excellent high-grade precious and base metals** from rock chip and dump sampling
- § **Airborne magnetic survey** identified significant high directly below historic Indae mine with intense magnetic low to the north of the granted Jinan 89 tenement
- § **High interpreted to be the response** to a possible, blind, mineralised intrusive body at depth.
